The MCape Group

Raise the Standard

MCape is a diversified group with structured operations across three key divisions: construction, fibre and painting. Using our collective 40 years of industry experience, we have – over the past decade – evolved South Africa’s geographical vista and demonstrated our formidable delivery capability. It’s a position we proudly occupy. We are South African. We have our roots here, so we know this landscape better than most.

Our vision is to be the leading holistic provider of specialised solutions to the construction cross sector. It’s the reason we focus on client service excellence and skills development across the group. Our high-performance team drives seamless project delivery and renders full service support across our project pipeline. Through their dedication and commitment, we can continuously enhance our capabilities for our clients. We believe technical competence together with elevating service delivery expectations is the key to growing our business interests.

Our partners, clients and team trust us, and we respect them. Each project we undertake with uncompromising transparency. We see each collaboration as a genuine partnership. This affords our clients inclusive opportunities in the exploration of new systems, trends and technologies to deliver best-practice, fully-customisable solutions that are precisely matched with their project requirements.

At the core of every solution we design and deliver is:

- » Excellent client service
- » Technical expertise
- » Innovative thinking

Who We Are

Expertise, Collaboration and Capability, We Make Your Fibre Optic Build Possible

Many say they can build your fibre optic network infrastructure. But, we can deliver. We take on the challenge to build exceptional fibre optic infrastructure within timeframes and to budget. With our turnkey approach we are able to assist clients with their fibre optic network infrastructure development requirements.

Drawing on our expertise across the MCape Group we deliver fibre optic infrastructure excellence that is unrivalled, while you focus on business. Trust us to be the perfect partner for your next project – our cohesion across the group gives us the strength to undertake even the most complex builds for our clients. We are a trusted contractor, recognised for delivering exemplary projects on time, every time.

Our Approach

Building Success Together

Delivering excellence is our relentless pursuit. It is a testament to our commitment to the future of the built environment. Using our combined financial, operational and technical experience, we meticulously execute our projects. Integrity is deeply rooted in our organisational heritage – it’s the reason we don’t undertake projects we cannot deliver on. Our approach is holistic and sustainable; always having consideration for the environment and minimising impact to the entire project. Throughout each project, aspects of sustainability are identified and where applicable, incorporated into our build programme. We always seek to apply best-practice industry methodology and this application continues to help us to deliver projects that meet our clients’ needs as well as that of their end users.

Pre-build/installation

During this phase, we integrate innovative systems into our planning to ensure financial and project objectives are met. We collaborate extensively with our clients, local municipalities, authorities, statutory bodies and their respective teams to mitigate any issues prior to the commencement of the project.

Build/Installation

During this phase, we consistently manage risk, interrogate and refine the build/installation programme. Where required, we deploy alternative techniques while providing stakeholder feedback with a view to continuously improve.

What We Offer

Your Project. Our Expertise

Through group-wide collaboration, we deliver outstanding results for our clients. We balance our vision with technical expertise and experience to deliver the best fibre optic network infrastructure solutions.

Our service offering includes:

1. SITE SURVEYS

- » Scheduling of a site visit with all the key stakeholders where our technical team will discuss and walk through the site to see what the best method would be to meet your requirement.
- » Generating a Site Survey Report

2. PROJECT PLANNING

- » Services and equipment planning.
- » Material planning
- » Logistics planning
- » Procurement

3. WAYLEAVE APPLICATION MANAGEMENT

- » Assess
- » Compile
- » Submit
- » Monitor

4. CONSTRUCTION MANAGEMENT

- » Traffic management
- » As-build project documentation
- » Cost management
- » Client liaising
- » Progress reporting

5. CIVIL ENGINEERING SERVICES

- » Route build
- » Access build
- » Fibre build
- » Trenching and reinstatements
- » Laying of underground fibre ducts and micro ducts.
- » Duct Integrity Testing
- » Building of fibre route manholes

Empowerment

Committed to Empowerment and Building Bright Futures

Operating in the industry we are acutely aware of its strengths and challenges. We are therefore fully engaged and committed to equality and diversity. That's why empowerment is a strategic business objective for us. Because, we don't just create solutions for our clients, we create opportunities for people.

We understand the local conditions of South Africa and are therefore able to connect people with learning opportunities and provide the required synthesis for human progress. We ensure a positive impact on social environments by operating with compassion.

Commencement of any work is structured according to binding legal agreements with the local government and community structures; ensuring guaranteed workflow and their participation in decision-making processes and employment. Through specially appointed community liaison office structures; competent local building craftsmen and selected individuals are employed as sub-contractors. This approach creates an abundance of employment opportunities ensuring a positive impact on local and social environments.

Meet the Team

Our People Make the Difference

Our business is directed by its leadership team. Within this team resides the necessary expertise to think strategically, originate opportunities, engage with parties on the ground and perform the necessary management oversight functions effectively.

Niyaz is a Btech Quantity Surveying graduate and a registered Quantity Surveyor (SACQSP - South African Council for the Quantity Surveying Profession). He is a results-driven quantity surveyor with expertise in cost control, procurement strategies and feasibility studies. He brings to the team his ability to effectively manage costs relating to civil engineering and building projects, whilst achieving the requisite quality standards. His penchant for assessing service and project cost effectiveness as well as tracking actual costs through project development renders him a core asset to the leadership team.

Using her problem-solving and analytical skills, Sisanda ensures the accuracy and overall financial management of the company. She has a penchant for developing, implementing and modifying financial models with a view to greater efficiency within the group. A keen communicator, she maintains good relations with suppliers and stakeholders to ensure smooth process flow.

Albert has a passion for construction, planning and client services. This is clearly evident in his track record of successfully completed projects. His leadership style focuses on engaging team members to communicate and solve problems to deliver projects of exceptional quality, to specification, and within budgetary and time constraints. Well-respected by his peers and his reporting staff as a person with integrity geared towards excellent customer service, having managed and completed several projects in excess of R380-million.

Jacques brings several years of key contracts management experience to the role from prior positions in the built environment. His attention to detail, out-of-the-box thinking and rapport-building skills often results in the development of innovative site solutions. This skilled professional with his expansive knowledge successfully mitigates risk and manages conflict to ensure the successful delivery of our projects.

In his role as Support Services Manager, Cheslan is deeply committed to ensuring a successful outcome for every supplier and client he works with and every stakeholder he supports. He enables others to achieve their objectives by acting as the conduit to building strong, mutually beneficial relationships. This ensures that high service levels are accorded to each of our projects. He brings several years of financial and procurement experience to the role that assists him to do in-depth analysis and cost reporting.

Bianca holds a National Diploma in Financial Management and has gained valuable experience in the financial sector as well as the built environment over the past years. She is responsible for the accounting of specific divisions within the group and assists in the preparation of audited financial statements. Cash-flow management and the establishing of reporting structures form part of her focus.

Health and Safety

Health and Safety First - No Exceptions

Our commitment to health and safety is uncompromising. It applies to everyone – project and planning teams, office-bound staff and the people from the communities in which we work. We achieve excellence by ensuring full compliance with industry best-practices and legal regulations alongside our group-wide policies.

Health and safety is built into each decision we take. All of our people are concerned with protecting one another and this is entrenched across all projects. We don't just have an indispensable commitment to it – it is a critical area of our business where we strive to create new standards of excellence.

YourSafetyFirst is our health and safety initiative employed throughout our training and mentoring programmes. This ensures that our people are safe and that we deliver on industry best-practice.
